CANADIAN GEOTECHNICAL JOURNAL

REVUE CANADIENNE DE GÉOTECHNIQUE

VOLUME 18, 1981

Subject Index / Index des matières[1]

A. General

02. *Historical Aspects*
Mather and landslides: 1838. White, G.W., and Legget, R.F., 294.
The foundations of London Bridge. Nash, J.K.T., 331.
Slope protection along St. Lawrence Seaway canals. Olpinski, K., and Christensen, C.J., 402.

04. *Textbooks, Handbooks, and Geotechnical Periodicals*
Géologie appliquée au génie civil: critique de livre. Chagnon, J.-Y., 156.
The formation of soil material: Book Review. Gillott, J.E., 157.
Rockfill in hydraulic engineering: Book Review. Lafleur, J., 329.
Foundation design and construction: Book Review. Gould, R.A., 471.
Pile foundation analysis and design: Book Review. Rowe, R.K., 472.
Soil genesis and classification: Book Review. Gillott, J.E., 609.
Proceedings of the International Symposium on the Geotechnics of Structurally Complex Formations, Capri: Book Review. Rowe, R.K., 610.

08. *Professional Ethics and Legal Requirements (incl. codes of practice)*
Landslide problems in Winnipeg. Baracos, A., and Graham, J., 390.
Lessons from Le Coteau landslide, Gatineau, Quebec. McRostie, G.C., and St-Louis, M.W., 593.

B. Engineering Geology

00. *General*
Géologie appliquée au génie civil: critique de livre. Chagnon, J.-Y., 156.

01. *Soil Formation*
The formation of soil material: Book Review. Gillott, J.E., 157.
Erratum: Yielding and rupture in a lacustrine clay. Baracos, A., Graham, J., and Domaschuk, L., 474.
Stage loading of a highway embankment on tidal flats. Burwash, W.J., and Matich, M.A.J., 535.
Soil genesis and classification: Book Review. Gillott, J.E., 609.

02. *Ground Water*
The hydrologic response of aquifers at surface-mine sites in western North Dakota. Moran, S.R., and Cherry, J.A., 543.

03. *Mass Movements and Subsidence*
Riverbank instability and development control in Saskatoon. Clifton, A.W., Krahn, J., and Fredlund, D.G., 95.
Creep and failure of slopes in clays. Tavenas, F., and Leroueil, S., 106.
Analysis of slope stability at Goonyella Mine. Richards, B.G., Coulthard, M.A., and Toh, C.T., 179.
Urban landslides in the vicinity of Vancouver, British Columbia, with special reference to the December 1979 rainstorm. Eisbacher, G.H., and Clague, J.J., 205.
Mather and landslides: 1838. White, G.W., and Legget, R.F., 294.
Landslide problems in Winnipeg. Baracos, A., and Graham, J., 390.
Fourth Canadian Geotechnical Colloquium: Strength and slope stability in Canadian soft clay deposits. Lefebvre, G., 420.
Lessons from Le Coteau landslide, Gatineau, Quebec. McRostie, G.C., and St-Louis, M.W., 593.

[1]Based on the International Geotechnical Classification System (IGC) approved in 1969 by the International Society for Soil Mechanics and Foundation Engineering. Permission to use this classification system is gratefully acknowledged.

04. *Natural Catastrophes (incl. earthquakes and floods)*
Urban landslides in the vicinity of Vancouver, British Columbia, with special reference to the December 1979 rainstorm. Eisbacher, G.H., and Clague, J.J., 205.

06. *Submarine Geology*
Sediment roughness characteristics measured by broadband spectral analysis of acoustic echoes. Dunsiger, A.D., and Cochrane, N.A., 475.
Ocean sediments—a study relating geophysical, geotechnical, and acoustic properties. Dunsiger, A.D., Chari, T.R., Fader, G.B., Peters, G.R., Simpkin, P.G., and Zielinski, A., 492.

07. *Structural Geology*
Proceedings of the International Symposium on the Geotechnics of Structurally Complex Formations, Capri: Book Review. Rowe, R.K., 610.

09. *Geomorphology*
Mather and landslides: 1838. White, G.W., and Legget, R.F., 294.

C. Site Investigations

00. *General (incl. planning of site investigations)*
Foundation design and construction: Book Review. Gould, R.A., 471.
The hydrologic response of aquifers at surface-mine sites in western North Dakota. Moran, S.R., and Cherry, J.A., 543.

02. *Geophysical Surveys*
Equipment and techniques for offshore survey and site investigations. Sly, P.G., 230.
Sediment roughness characteristics measured by broadband spectral analysis of acoustic echoes. Dunsiger, A.D., and Cochrane, N.A., 475.
Ocean sediments—a study relating geophysical, geotechnical, and acoustic properties. Dunsiger, A.D., Chari, T.R., Fader, G.B., Peters, G.R., Simpkin, P.G., and Zielinski, A., 492.

03. *Probings (Soundings)*
Equipment and techniques for offshore survey and site investigations. Sly, P.G., 230.
Ocean sediments—a study relating geophysical, geotechnical, and acoustic properties. Dunsiger, A.D., Chari, T.R., Fader, G.B., Peters, G.R., Simpkin, P.G., and Zielinski, A., 492.

05. *Boring Technique and Equipment and Recording of Results*
Causes of sampling disturbance and design of a new sampler for sensitive soils. La Rochelle, P., Sarrailh, J., Tavenas, F., Roy, M., and Leroueil, S., 52.
Equipment and techniques for offshore survey and site investigations. Sly, P.G., 230.
Influence of cutting shoe size in self-boring pressuremeter tests in sensitive clays: Discussion. Gambin, M., 327.
An empirical evaluation of pressuremeter test data. Arnold, M., 455.

06. *Sampling, Handling of Samples*
Causes of sampling disturbance and design of a new sampler for sensitive soils. La Rochelle, P., Sarrailh, J., Tavenas, F., Roy, M., and Leroueil, S., 52.

07. *Measurement of Field Conditions (incl. ground water and in situ stress)*
Behaviour of a sensitive clay during pile driving. Roy, M., Blanchet, R., Tavenas, F., and La Rochelle, P., 67.
Equipment and techniques for offshore survey and site investigations. Sly, P.G., 230.
Fourth Canadian Geotechnical Colloquium: Strength and slope stability in Canadian soft clay deposits. Lefebvre, G., 420.
Comparison of results from air-acceptance and hydrogeological tests associated with underground coal gasification. Edwards, W.C., and Vogwill, R.I.J., 443.

08. *Field Testing (excl. tests for engineering properties, see Groups D and F)*
Behaviour of a sensitive clay during pile driving. Roy, M., Blanchet, R., Tavenas, F., and La Rochelle, P., 67.
Techniques d'essais en chantier et en laboratoire pour la conception des fondations ancrées à la roche. Ballivy, G., Poulin, B., Guertin, J., Corriveau, R., 577.

09. *Reports on Site Investigations*
Ocean sediments—a study relating geophysical, geotechnical, and acoustic properties. Dunsiger, A.D., Chari, T.R., Fader, G.B., Peters, G.R., Simpkin, P.G., and Zielinski, A., 492.
Stage loading of a highway embankment on tidal flats. Burwash, W.J., and Matich, M.A.J., 535.
The hydrologic response of aquifers at surface-mine sites in western North Dakota. Moran, S.R., and Cherry, J.A., 543.

Lessons from Le Coteau landslide, Gatineau, Quebec. McRostie, G.C., and St-Louis, M.W., 593.

D. Soil Properties: Laboratory and Field Determinations

02. *Physico-chemical Properties (incl. corrosion and thixotropy)*
The segregation potential of a freezing soil. Konrad, J.-M., and Morgenstern, N.R., 482.

04. *Permeability and Capillarity*
Comparison of results from air-acceptance and hydrogeological tests associated with underground coal gasification. Edwards, W.C., and Vogwill, R.I.J., 443.
The segregation potential of a freezing soil. Konrad, J.-M., and Morgenstern, N.R., 482.

05. *Compressibility (incl. consolidation and swelling)*
The foundations of London Bridge. Nash, J.K.T., 331.
The prediction of settlements and heave in clays: Discussion. Dakshanamurthy, V., 466.
The prediction of settlements and heave in clays: Discussion. Choi, Y.K., and Cepeda-Diaz, A.F., 467.
Stage loading of a highway embankment on tidal flats. Burwash, W.J., and Matich, M.A.J., 535.
The prediction of settlements and heave in clays: Reply. Kodandaramaswamy, K., and Rao, S.N., 608.

06. *Shear-deformation and Strength Properties (incl. pore-water pressure)*
A versatile hollow cylinder triaxial device. Dusseault, M.B., 1.
Strain rate behavior of Saint-Jean-Vianney clay: Reply. Vaid, Y.P., Robertson, P.K., and Campanella, R.G., 145.
Simple shear creep tests on frozen soils. Weaver, J.S., and Morgenstern, N.R., 217.
Lateral load tests in clay using inflatable air jacks. Olsson, L., 316.
The long term stability of a cutting slope in an overconsolidated sensitive clay: Discussion. Lefebvre, G., 322.
The long term stability of a cutting slope in an overconsolidated sensitive clay: Reply. Silvestri, V., 323.
Influence of cutting shoe size in self-boring pressuremeter tests in sensitive clays: Discussion. Gambin, M., 327.
Fourth Canadian Geotechnical Colloquium: Strength and slope stability in Canadian soft clay deposits. Lefebvre, G., 420.
An empirical evaluation of pressuremeter test data. Arnold, M., 455.
The behaviour of embankments on clay foundations: Discussion. Mesri, G., and Choi, Y.K., 460.
The behaviour of embankments on clay foundations: Reply. Tavenas, F., and Leroueil, S., 462.
Erratum: Yielding and rupture in a lacustrine clay. Baracos, A., Graham, J., and Domaschuk, L., 474.
The performance of marine anchors with planar flukes in sand. LeLievre, B., and Tabatabaee, J., 520.

07. *Dynamic Properties*
Dynamic soil–structure interaction modelled experimentally on a geotechnical centrifuge. Morris, D.V., 40.
Dynamic properties of some cohesive soils of Ontario. Kim, T.C., and Novak, M., 371.
Resonant column technique for dynamic testing of cohesive soils. Novak, M., and Kim, T.C., 448.

08. *Thermal Properties (incl. freezing)*
The measurement of unfrozen water content by time domain reflectometry: results from laboratory tests. Patterson, D.E., and Smith, M.W., 131.
Simple shear creep tests on frozen soils. Weaver, J.S., and Morgenstern, N.R., 217.
Pile design in permafrost. Weaver, J.S., and Morgenstern, N.R., 357.
The segregation potential of a freezing soil. Konrad, J.-M., and Morgenstern, N.R., 482.
Heaving behaviour of soils in the step freezing mode. Penner, E., 583.

E. Analysis of Soil-engineering Problems

02. *Deformation and Settlement Problems (incl. piles)*
The behaviour of footings resting on a non-homogeneous soil mass with a crust. Part I. Strip footings. Rowe, R.K., and Booker, J.R., 250.
The behaviour of footings resting on a non-homogeneous soil mass with a crust. Part II. Circular footings. Rowe, R.K., and Booker, J.R., 265.
The theory of one-dimensional consolidation of saturated clays. II. Finite nonlinear consolidation of thick homogeneous layers. Gibson, R.E., Schiffman, R.L., and Cargill, K.W., 280.
Evaluation of pile load tests in the Edmonton area. Thomson, S., 313.
Pile design in permafrost. Weaver, J.S., and Morgenstern, N.R., 357.
The prediction of settlements and heave in clays: Discussion. Dakshanamurthy, V., 466.
The prediction of settlements and heave in clays: Discussion. Choi, Y.K., and Cepeda-Diaz, A.F., 467.
Pile foundation analysis and design: Book Review. Rowe, R.K., 472.
Stage loading of a highway embankment on tidal flats. Burwash, W.J., and Matich, M.A.J., 535.

The prediction of settlements and heave in clays: Reply. Kodandaramaswamy, K., and Rao, S.N., 608.

03. *Bearing Capacity of Soils*

The bearing capacity of rigid piles and pile groups under inclined loads in layered sand. Meyerhof, G.G., Mathur, S.K., and Valsangkar, A.J., 514.

Experimental evaluation of bearing capacity of footings subjected to inclined loads. Hanna, A.M., and Meyerhof, G.G., 599.

04. *Bearing Capacity of Piles*

Behaviour of a sensitive clay during pile driving. Roy, M., Blanchet, R., Tavenas, F., and La Rochelle, P., 67.

Behaviour of friction piles in soft sensitive clays: Reply. Blanchet, R., Tavenas, F., and Garneau, R., 151.

Lateral resistance and deflection of rigid walls and piles in layered soils. Meyerhof, G.G., Mathur, S.K., and Valsangkar, A.J., 159.

The bearing capacity of rigid piles and pile groups under inclined loads in clay. Meyerhof, G.G., 297.

Dynamic response curves for vertically loaded floating pile foundations. Kuhlemeyer, R.L., 300.

Evaluation of pile load tests in the Edmonton area. Thomson, S., 313.

Pile design in permafrost. Weaver, J.S., and Morgenstern, N.R., 357.

Pile foundation analysis and design: Book Review. Rowe, R.K., 472.

05. *Earth Pressure Problems (incl. silos)*

Deformations and pore pressures in the vicinity of a precast, segmented, concrete-lined tunnel in clay: Discussion. Milligan, V., 152.

Deformations and pore pressures in the vicinity of a precast, segmented, concrete-lined tunnel in clay: Reply. Palmer, J.H.L., and Belshaw, D.J., 154.

Lateral resistance and deflection of rigid walls and piles in layered soils. Meyerhof, G.G., Mathur, S.K., and Valsangkar, A.J., 159.

Lateral load tests in clay using inflatable air jacks. Olsson, L., 316.

Reinforced earth retaining walls under strip load: Discussion. Corté, J.F., 324.

Reinforced earth retaining walls under strip load: Reply. Kennedy, J.B., Laba, J.T., and Mossaad, M.A., 326.

The performance of marine anchors with planar flukes in sand. LeLievre, B., and Tabatabaee, J., 520.

Comparison of fabric sheet-reinforced earth design methods. Nicholls, R.L., 585.

06. *Stability of Slopes, Cuts, and Excavations*

Riverbank instability and development control in Saskatoon. Clifton, A.W., Krahn, J., and Fredlund, D.G., 95.

Creep and failure of slopes in clays. Tavenas, F., and Leroueil, S., 106.

Remarks on the validity of stability analyses: Discussion. Robert, J.M., 146.

Remarks on the validity of stability analyses: Reply. Tavenas, F., Trak, B., and Leroueil, S., 150.

Analysis of slope stability at Goonyella Mine. Richards, B.G., Coulthard, M.A., and Toh, C.T., 179.

The long term stability of a cutting slope in an overconsolidated sensitive clay: Discussion. Lefebvre, G., 322.

The long term stability of a cutting slope in an overconsolidated sensitive clay: Reply. Silvestri, V., 323.

Landslide problems in Winnipeg. Baracos, A., and Graham, J., 390.

Fourth Canadian Geotechnical Colloquium: Strength and slope stability in Canadian soft clay deposits. Lefebvre, G., 420.

The behaviour of embankments on clay foundations: Discussion. Mesri, G., and Choi, Y.K., 460.

The behaviour of embankments on clay foundations: Reply. Tavenas, F., and Leroueil, S., 462.

Lessons from Le Coteau landslide, Gatineau, Quebec. McRostie, G.C., and St-Louis, M.W., 593.

07. *Seepage and Other Hydraulic Problems (incl. erosion)*

Slope protection along St. Lawrence Seaway canals. Olpinski, K., and Christensen, C.J., 402.

Effectiveness of seepage control elements for embankments on semipervious foundations. Lefebvre, G., Lupien, C., Pare, J.J., and Tournier, J.-P., 572.

08. *Dynamic Problems*

Dynamic soil–structure interaction modelled experimentally on a geotechnical centrifuge. Morris, D.V., 40.

Dynamic response curves for vertically loaded floating pile foundations. Kuhlemeyer, R.L., 300.

Prediction of frequency and amplitude of foundations at resonance. Sridharan, A., and Nagendra, M.V., 603.

09. *Frost Action and Heat-transfer Problems*

Performance of temporary tie-backs under winter conditions. Morgenstern, N.R., and Sego, D.C., 566.

Heaving behaviour of soils in the step freezing mode. Penner, E., 583.

F. Rock Properties: Laboratory and Field Determinations

00. *General (incl. laboratory supplies)*

Proceedings of the International Symposium on the Geotechnics of Structurally Complex Formations, Capri: Book Review. Rowe, R.K., 610.

03. *Composition, Structure, and Density (incl. porosity)*
Side resistance rock sockets in sandstone, mudstone, and shale. Williams, A.F., and Pells, P.J.N., 502.

04. *Permeability and Capillarity*
The effect of stress on the primary permeability of rock cores—a facet of hydraulic fracturing. Heystee, R., and Roegiers, J.-C., 195.
The hydrologic response of aquifers at surface-mine sites in western North Dakota. Moran, S.R., and Cherry, J.A., 543.

06. *Shear-deformation and Strength Properties*
Design of tunnel lining in rock for long term time effects. Lo, K.Y., and Yuen, C.M.K., 24.
The effect of stress on the primary permeability of rock cores—a facet of hydraulic fracturing. Heystee, R., and Roegiers, J.-C., 195.
Side resistance rock sockets in sandstone, mudstone, and shale. Williams, A.F., and Pells, P.J.N., 502.
Techniques d'essais en chantier et en laboratoire pour la conception des fondations ancrées à la roche. Ballivy, G., Poulin, B., Guertin, J., Corriveau, R., 577.

G. Analysis of Rock-engineering Problems

01. *In Situ Stresses caused by Gravity, Tectonics, Applied Loads, and Excavations*
Design of tunnel lining in rock for long term time effects. Lo, K.Y., and Yuen, C.M.K., 24.

02. *Deformation Problems*
Design of tunnel lining in rock for long term time effects. Lo, K.Y., and Yuen, C.M.K., 24.

03. *Bearing Capacity of Rock*
Techniques d'essais en chantier et en laboratoire pour la conception des fondations ancrées à la roche. Ballivy, G., Poulin, B., Guertin, J., Corriveau, R., 577.

04. *Stability of Slopes, Excavations, and Openings*
Analysis of slope stability at Goonyella Mine. Richards, B.G., Coulthard, M.A., and Toh, C.T., 179.
Proceedings of the International Symposium on the Geotechnics of Structurally Complex Formations, Capri: Book Review. Rowe, R.K., 610.

05. *Seepage Problems (incl. drainage)*
Comparison of results from air-acceptance and hydrogeological tests associated with underground coal gasification. Edwards, W.C., and Vogwill, R.I.J., 443.

The hydrologic response of aquifers at surface-mine sites in western North Dakota. Moran, S.R., and Cherry, J.A., 543.

H. Design, Construction, and Behaviour of Engineering Works

01. *Foundations of Structures (buildings, bridges, tanks, etc.)*
Adfreeze strength of model piles in ice. Parameswaran, V.R., 8.
The influence of geotechnical engineering on the evolution of offshore structures in the North Sea. Gibson, R.E., and Dowse, B.E.W., 171.
The behaviour of footings resting on a non-homogeneous soil mass with a crust. Part I. Strip footings. Rowe, R.K., and Booker, J.R., 250.
The behaviour of footings resting on a non-homogeneous soil mass with a crust. Part II. Circular footings. Rowe, R.K., and Booker, J.R., 265.
The bearing capacity of rigid piles and pile groups under inclined loads in clay. Meyerhof, G.G., 297.
Dynamic response curves for vertically loaded floating pile foundations. Kuhlemeyer, R.L., 300.
Evaluation of pile load tests in the Edmonton area. Thomson, S., 313.
The foundations of London Bridge. Nash, J.K.T., 331.
Pile design in permafrost. Weaver, J.S., and Morgenstern, N.R., 357.
Foundation design and construction: Book Review. Gould, R.A., 471.
Side resistance rock sockets in sandstone, mudstone, and shale. Williams, A.F., and Pells, P.J.N., 502.
The bearing capacity of rigid piles and pile groups under inclined loads in layered sand. Meyerhof, G.G., Mathur, S.K., and Valsangkar, A.J., 514.
Experimental evaluation of bearing capacity of footings subjected to inclined loads. Hanna, A.M., and Meyerhof, G.G., 599.

Prediction of frequency and amplitude of foundations at resonance. Sridharan, A., and Nagendra, M.V., 603.

02. *Retaining Structures and Cutoff Walls*
Reinforced earth retaining walls under strip load: Discussion. Corté, J.F., 324.
Reinforced earth retaining walls under strip load: Reply. Kennedy, J.B., Laba, J.T., and Mossaad, M.A., 326.
The foundations of London Bridge. Nash, J.K.T., 331.
Performance of temporary tie-backs under winter conditions. Morgenstern, N.R., and Sego, D.C., 566.
Comparison of fabric sheet-reinforced earth design methods. Nicholls, R.L., 585.

04. *Earthworks, Embankments, Fills, and Dams (for compaction see K01)*
Stage loading of a highway embankment on tidal flats. Burwash, W.J., and Matich, M.A.J., 535.

05. *Underground Structures (incl. tunnels, conduits, and shafts)*
Design of tunnel lining in rock for long term time effects. Lo, K.Y., and Yuen, C.M.K., 24.
Deformations and pore pressures in the vicinity of a precast, segmented, concrete-lined tunnel in clay: Discussion. Milligan, V., 152.
Deformations and pore pressures in the vicinity of a precast, segmented, concrete-lined tunnel in clay: Reply. Palmer, J.H.L., and Belshaw, D.J., 154.

07. *Harbours, Canals, and Coastal Protective Works*
Slope protection along St. Lawrence Seaway canals. Olpinski, K., and Christensen, C.J., 402.

K. Construction Methods and Equipment

04. *Soil and Rock Excavation, Processing, and Transportation*
Analysis of slope stability at Goonyella Mine. Richards, B.G., Coulthard, M.A., and Toh, C.T., 179.

07. *Piles and Pile Driving*
Side resistance rock sockets in sandstone, mudstone, and shale. Williams, A.F., and Pells, P.J.N., 502.

11. *Anchorages, Tied-back Walls, Reinforcement, Linings, and Other Supports of Soil and Rock*
Slope protection along St. Lawrence Seaway canals. Olpinski, K., and Christensen, C.J., 402.
The performance of marine anchors with planar flukes in sand. LeLievre, B., and Tabatabaee, J., 520.
Performance of temporary tie-backs under winter conditions. Morgenstern, N.R., and Sego, D.C., 566.
Comparison of fabric sheet-reinforced earth design methods. Nicholls, R.L., 585.

12. *Deep-water Construction Methods and Equipment (incl. dredging, barge dumping, etc.)*
The influence of geotechnical engineering on the evolution of offshore structures in the North Sea. Gibson, R.E., and Dowse, B.E.W., 171.

M. Materials of Construction

04. *Plastics and Similar Materials*
Comparison of fabric sheet-reinforced earth design methods. Nicholls, R.L., 585.

S. Snow and Ice Mechanics and Engineering

01. *Snow and Ice Cover*
Growth of first-year sea ice, Eclipse Sound, Baffin Island, Canada. Sinha, N.K., and Nakawo, M., 17.
A physical theory of snow gliding. McClung, D.M., 86.
On the computation of parameters that model snow avalanche motion. Bakkehoi, S., Cheng, T., Domaas, U., Lied, K., Perla, R., and Schieldrop, B., 121.

02. *Properties of Snow and Ice*
Adfreeze strength of model piles in ice. Parameswaran, V.R., 8.
A physical theory of snow gliding. McClung, D.M., 86.
On the computation of parameters that model snow avalanche motion. Bakkehoi, S., Cheng, T., Domaas, U., Lied, K., Perla, R., and Schieldrop, B., 121.
Simple shear creep tests on frozen soils. Weaver, J.S., and Morgenstern, N.R., 217.

T. Related Disciplines

03. *Agriculture and Pedology*
Soil genesis and classification: Book Review. Gillott, J.E., 609.

06. *Civil Engineering*
The performance of marine anchors with planar flukes in sand. LeLievre, B., and Tabatabaee, J., 520.
